HIMANSHU GAUR

FULL STACK SOFTWARE ENGINEER

Delhi, India | +91 88996 99847 | gaur.himanshu0407@gmail.com
linkedin.com/in/himanshu-gaur-20a235209| github.com/gaur-himanshu

PROFESSIONAL SUMMARY

Impact-driven Full Stack Builder & Software Engineer with 3 years of experience digitalizing heavy industrial plant operations and architecting end-to-end enterprise systems. Specialized in building high-availability applications using C# .NET Core, React.js, React Native, and PostgreSQL, with deep expertise in connecting plant-floor data feeds to cloud and web platforms. Passionate about leveraging AI tools (LLMs, GitHub Copilot) for rapid prototyping, CI/CD automated testing, and iterative delivery across cross-functional, international teams in Europe and Southeast Asia.

TECHNICAL SKILLS

Languages & Frameworks: C# (.NET Core), ASP.NET Core Web API, JavaScript (ES6+), React.js, React Native, Python, SQL, HTML5/CSS3

Integrations & Data Flows: RESTful APIs, OPC Server Ingestion, APIS (Prediktor Edge Time-Series DB), PostgreSQL, Grafana Scene Plugin SDK

DevOps, Cloud & Practices: Docker, CI/CD Pipelines (GitHub Actions/Azure DevOps), Git, Linux Servers, OAuth2 (Azure AD), Iterative Delivery

AI & Productivity Tools: GitHub Copilot, Large Language Models (LLMs) for rapid prototyping, automated testing, and problem-solving

PROFESSIONAL EXPERIENCE

SMS India Pvt. Ltd. (SMS Group) | *Gurugram, India*

Full Stack Software Engineer & Lead (CMMS & EAFXpert) • *Aug 2023 – Present*

- End-to-End Solution Building: Spearheaded the design and delivery of an enterprise Computerized Maintenance Management System (CMMS) from idea to production, utilizing a .NET Core backend, React.js web portal, and React Native mobile app to reduce estimated plant downtime by 20%.
- Digital Operations & Process Automation: Led the transition from paper tracking to a digitalized platform (EAFXpert), automating direct Level 1 data capture to cut manual entry time by 40%, eliminate human error, and enhance plant production output.
- Cross-Functional & Global Stakeholder Alignment: Executed critical on-site deployments, stakeholder requirements gathering, and end-user technical training internationally across Luxembourg, Germany, and the Philippines.
- Automated Workflows & Tooling: Engineered automated email notification services for preventive maintenance cycles alongside bulk Excel parsing tools for plant asset, zone, and user privilege management.
- Tech Stack & Practices: C# .NET Core, React.js, React Native, PostgreSQL, Docker, CI/CD, RulesXpert, BIXpert.

Full Stack Developer (Data Platforms & Extension Services)

- Real-Time Data Ingestion & Systems Integration: Managed and configured APIS (Prediktor Edge) as a high-availability time-series database connected to plant OPC servers, enabling smooth, reliable real-time data flows across systems.
- Interactive Analytics & Custom Plugins: Developed and injected a custom Grafana Scene Plugin (Time Optimizer) into live production, enabling operators to log process delay justifications directly inside operational dashboards.
- Automated Ingestion (Package Pulse): Engineered an automated purchase order tracking application using React.js and .NET Core with background mail parsing to capture unstructured email metadata and persist structured logs.
- Enterprise Auth & Cloud Sync: Integrated secure OAuth2 authentication via Azure AD and implemented automatic data synchronization with external resource records using the Azure Power API Platform.
- Tech Stack: ASP.NET Core, React.js, Grafana Scene Plugin, APIS (Prediktor Edge), OAuth2 (Azure AD), Docker, Python.

EDUCATION

B. Tech in Computer Science & Engineering | GLA University, Mathura • Graduated 2023 • Grade: 8.63 CPI

COMMUNITY & ACHIEVEMENTS

- Certificate of Merit: Awarded formal company recognition for outstanding software execution and delivery on high-impact industrial digitalization projects (EAFXpert).
- Global On-Site Exposure: Successfully conducted professional on-site operations, stakeholder alignment, and technical training in Luxembourg, Germany, and the Philippines.
- AI Development Proficiency: Adept at leveraging GitHub Copilot and LLMs to optimize algorithm design, generate unit test suites, and accelerate root-cause bug analysis.
